Waii Dining Chair | Waii Collection

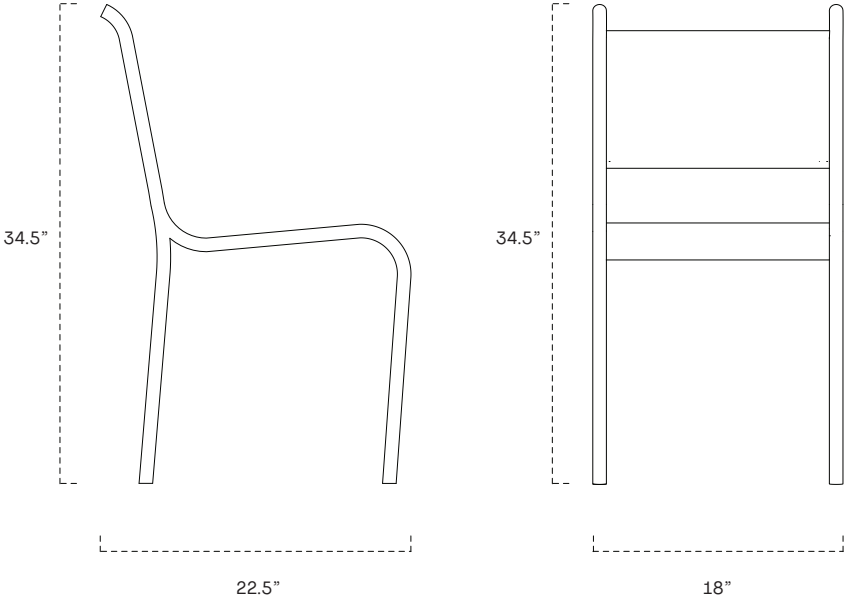

DESCRIPTION

Designed by Office of Tangible Space for PERN BAAN, the Waii Dining Chair explores the contrast between traditional Thai weaving and contemporary metal fabrication. Handwoven rattan panels sit flush within a sculptural brushed stainless steel frame, creating an integrated expression of craft and architecture. Available in natural rattan for interior use or high-performance synthetic rattan for indoor and outdoor applications, the chair offers a versatile range of colors, textures, and weaving patterns.
